§146 · Counterfeiting of currency

CounterfeitingOfCurrency · provenance StGB 146 · (1) whole encoded; (2)-(3) struck

SOURCE (ENGLISH, UNOFFICIAL)

(1) A term of imprisonment of not less than one year shall be imposed on anyone who 1. counterfeits money with the intention that it be put into circulation as genuine or that such circulation be facilitated, or falsifies money with this intention in such a way as to give the impression of a higher value, 2. procures or offers for sale counterfeit money with that intention, or 3. puts into circulation as genuine counterfeit money which he has counterfeited, falsified or procured under the circumstances described in points 1 or 2. (2) If the offender acts on a commercial basis or as a member of a gang which has formed for the purpose of continuously committing currency counterfeiting, the penalty shall be imprisonment for a term of not less than two years. (3) In less serious cases under paragraph 1, the penalty shall be imprisonment for a term of three months to five years; in less serious cases under paragraph 2, the penalty shall be imprisonment for a term of one year to ten years.

OPEROME MARKUP – ORIGINAL TEXT ENCODED

«if CounterfeitingOfCurrency is true»(1) A term of imprisonment of not less than one year shall be imposed on {Actor} who 1. «if {Counterfeits} is true»counterfeits money «end if» «if {ActsWithCirculationIntention} is true»with the intention that «if {CirculationAsGenuine} is true»it be put into circulation as genuine «end if» «if {CirculationFacilitated} is true»or that such circulation be facilitated «end if» «end if», or «if {Falsifies} is true»falsifies money «end if» with this intention in such a way as to «if {ImpressionOfHigherValue} is true»give the impression of a higher value «end if», 2. «if {Procures} is true»procures «end if» «if {OffersForSale} is true»or offers for sale «end if» «if {CounterfeitMoney} is true»counterfeit money «end if» with that intention, or 3. «if {PutsIntoCirculationAsGenuine} is true»puts into circulation as genuine «end if» «if {CounterfeitMoney} is true»counterfeit money «end if» «if {ObtainedUnderPoints10r2} is true»which {Actor} has counterfeited, falsified or procured under the circumstances described in points 1 or 2 «end if». RECONSTRUCTION FROM THE SUBSTRATE

Committed by any person (the actor) who: ((({Actor} counterfeits money or ({Actor} falsifies money and the falsification gives the impression of a higher value)) and ({Actor} acts with the intention concerning circulation and (the money is to be put into circulation as genuine or such circulation is to be facilitated))) or (the money is counterfeit and ({Actor} procures the money or {Actor} offers the money for sale) and ({Actor} acts with the intention concerning circulation and (the money is to be put into circulation as genuine or such circulation is to be facilitated)))) or (the money is counterfeit and {Actor} puts the money into circulation as genuine and {Actor} obtained the money under the circumstances of the preceding points).

Assembled only from the variable surface forms (including the actor) and the computable structure carried in the XSD, not from the source column. It should read as the offence. This is the recoverability test: the law is reverse-derivable from the substrate.

DEPENDENT ASSESSMENTS (REACTIVE INVALIDATION)

ASSESSMENT	DEPENDS ON	INVALIDATION	TRIGGER EFFECT
[CirculationIntention]	ActsWithCirculationIntention, CirculationAsGenuine, CirculationFacilitated	false	Recomputes when any input changes; propagates into the composite.
[Leg2]	CounterfeitMoney, Procures, OffersForSale, CirculationIntention	false	Recomputes when any input changes; propagates into the composite.
[Leg1]	Counterfeits, Falsifies, ImpressionOfHigherValue, CirculationIntention	false	Recomputes when any input changes; propagates into the composite.
[Leg3]	CounterfeitMoney, PutsIntoCirculationAsGenuine, ObtainedUnderPoints10r2	false	Recomputes when any input changes; propagates into the composite.
[CounterfeitingOfCurrency]	Leg1, Leg2, Leg3	false	Final composite. Re-evaluates on any input change; cannot resolve true while any input is unknown.
prohibition (CFC-P0)	[CounterfeitingOfCurrency]	re-derives	The PrimeRule prohibition holds whenever the composite is true; re-derives on any change.

DECISION TREE

PHASE 1: gather inputs (Session)

- └ {Actor}
- └ {ActsWithCirculationIntention}
- └ {CirculationAsGenuine}
- └ {CirculationFacilitated}
- └ {CounterfeitMoney}
- └ {Counterfeits}
- └ {Falsifies}
- └ {ImpressionOfHigherValue}
- └ {ObtainedUnderPoints10r2}
- └ {OffersForSale}
- └ {Procures}
- └ {PutsIntoCirculationAsGenuine}

↓

PHASE 2: evaluate act / intermediate computables

- └ [CirculationIntention] = ActsWithCirculationIntention is true and (CirculationAsGenuine is true or CirculationFacilitated is true)
- └ [Leg2] = CounterfeitMoney is true and (Procures is true or OffersForSale is true) and CirculationIntention is true
- └ [Leg1] = (Counterfeits is true or (Falsifies is true and ImpressionOfHigherValue is true)) and CirculationIntention is true
- └ [Leg3] = CounterfeitMoney is true and PutsIntoCirculationAsGenuine is true and ObtainedUnderPoints10r2 is true

↓

PHASE 3: evaluate the objective conditions

- └ [CounterfeitingOfCurrency] = Leg1 is true or Leg2 is true or Leg3 is true

↓

VERDICT (PrimeRule)

└ [CounterfeitingOfCurrency] is true → objective conditions realised → conduct PROHIBITED (subject to permissions / exceptions)

└ [CounterfeitingOfCurrency] is false → not realised

RECURSION / RE-ENTRY NOTES

No runtime re-entry. The operome is a single forward evaluation: inputs → act computable(s) → Tatbestand composite → prohibition verdict. Attempt and preparation, where the section provides for them, are separate operomes, not re-entries.

CIRCULARITY CHECK

[CounterfeitingOfCurrency] depends on [CirculationIntention], [Leg2], [Leg1], [Leg3]; none refer back to [CounterfeitingOfCurrency]. No definitional cycle.

Each computable reduces to input Booleans; the graph is a DAG and topologically sortable. Tristate is monotone: any unknown input holds the composite at unknown rather than forcing a verdict.

QUESTIONNAIRE

FLAGS

SCOPE Paragraph 1 whole: the three legs (counterfeiting and falsifying; procuring and offering; putting into circulation) with the circulation intention spanning legs 1 and 2 by the source's own back-references. Struck per the marked-up source: the sanctions head of (1), (2) and (3).

CIRCULATION INTENTION RETAINED (DELIBERATE) "in der Absicht, daß es als echt in Verkehr gebracht oder daß ein solches Inverkehrbringen ermöglicht werde" is live per the markup and the retention criterion: without it, making or holding imitation money is innocuous (props, specimens). The gate {ActsWithCirculationIntention} spans the coordinated objects; "in dieser Absicht" and "mit that intention" in legs 1 and 2 consume the same gate, mirrored in [Leg1] and [Leg2].

LEG 3'S PREDICATE {ObtainedUnderPoints1Or2} carries the back-reference to the circumstances of points 1 and 2 as a single status predicate; whether those circumstances obtained resolves against [Leg1] and [Leg2] on the facts.

SANCTIONS PHRASE The penalty stands at the head of (1) in this section's drafting; struck per the markup, with "wer" live.

TREATMENT §146 is Operomise-tagged.

§147 · Putting counterfeit money into circulation

PuttingCounterfeitMoneyIntoCirculation · provenance StGB 147 · (1) encoded with the rule-12 negative; (2) struck

SOURCE (ENGLISH, UNOFFICIAL)	OPEROME MARKUP - ORIGINAL TEXT ENCODED

ASSESSMENT	DEPENDS ON	INVALIDATION	TRIGGER EFFECT
[DeceptionInLegalTransactions]	FalselyInfluencesDataProcessing	false	Final composite. Re-evaluates on any input change; cannot resolve true while any input is unknown.
prohibition (DDP-P0)	[DeceptionInLegalTransactions]	re-derives	The PrimeRule prohibition holds whenever the composite is true; re-derives on any change.

DECISION TREE

PHASE 1: gather inputs (Session)

{Actor}

{FalselyInfluencesDataProcessing}

↓

PHASE 2: evaluate act / intermediate computables

↓

PHASE 3: evaluate the objective conditions

[DeceptionInLegalTransactions] = FalselyInfluencesDataProcessing is true

↓

VERDICT (PrimeRule)

[DeceptionInLegalTransactions] is true → objective conditions realised → conduct PROHIBITED (subject to permissions / exceptions)

[DeceptionInLegalTransactions] is false → not realised

RECURSION / RE-ENTRY NOTES

No runtime re-entry. The operome is a single forward evaluation: inputs → act computable(s) → Tatbestand composite → prohibition verdict. Attempt and preparation, where the section provides for them, are separate operomes, not re-entries.

CIRCULARITY CHECK

- [DeceptionInLegalTransactions] depends on ; none refer back to [DeceptionInLegalTransactions]. No definitional cycle.
- Each computable reduces to input Booleans; the graph is a DAG and topologically sortable. Tristate is monotone: any unknown input holds the composite at unknown rather than forcing a verdict.

QUESTIONNAIRE

#	CASCADE	VARIABLE	QUESTION / PROMPT	INPUT
Q1	Session	{Actor}	Who or what is the actor? Any natural person, legal person, or non-human system. Canonical home: PrimeRule.?	Reference
Q2	Session	{FalselyInfluencesDataProcessing}	Element/Datum: {Actor} falsely influences a data-processing operation in legal transactions.?	Boolean

FLAGS

SCOPE The single sentence, wholly live in the markup, nothing struck: a deeming rule, not an offence. It is encoded as a definition scope on the §184h pattern, authoring [DeceptionInLegalTransactions] for consumption by name.

CONSUMER §267's gate {ActsToDeceiveInLegalTransactions} reads its extended content from this scope: deception purposes satisfied through the false influencing of data processing fall within the gate.

TREATMENT §270 is Operomise-tagged.

§306 · Arson

Arson · provenance StGB 306 · (1) whole encoded; (2) struck

SOURCE (ENGLISH, UNOFFICIAL)	OPEROME MARKUP - ORIGINAL TEXT ENCODED
------------------------------	--

(1) Any person who sets on fire, or destroys wholly or in part by setting a fire, the following objects belonging to another: 1. buildings or huts, 2. business premises or technical installations, in particular machines, 3. warehouses or stocks of goods, 4. motor vehicles, rail, air or water vehicles, 5. forests, heathland or moors, or 6. installations or products of agriculture, the food industry or forestry, shall be punished with imprisonment for a term of one to ten years. (2) In less serious cases, the penalty shall be imprisonment for a term of six months to five years.

«if Arson is true»(1) {Actor} who, in respect of the following objects «if {BelongsToAnother} is true»belonging to another «end if»: 1. «if {Buildings} is true»buildings «end if» «if {Huts} is true»or huts «end if», 2. «if {BusinessPremises} is true»business premises «end if» «if {TechnicalInstallations} is true»or technical installations, in particular machines «end if», 3. «if {Warehouses} is true»warehouses «end if» «if {StocksOfGoods} is true»or stocks of goods «end if», 4. «if {MotorVehicles} is true»motor vehicles «end if» «if {RailVehicles} is true», rail «end if» «if {AirVehicles} is true», air «end if» «if {WaterVehicles} is true»or water vehicles «end if», 5. «if {Forests} is true»forests «end if» «if {Heathland} is true», heathland «end if» «if {Moors} is true»or moors «end if», or 6. «if {SectorInstallations} is true»installations «end if» «if {SectorProducts} is true»or products «end if» «if {AgriculturalSector} is true»of agriculture «end if» «if {FoodSector} is true», the food industry «end if» «if {ForestrySector} is true»or forestry «end if», «if {SetsOnFire} is true»sets the object on fire «end if» or «if {DestroysByFireSetting} is true»destroys it «if {Wholly} is

RECONSTRUCTION FROM THE SUBSTRATE

Committed by any person (the actor) who: the object belongs to another and ((buildings or huts) or (business premises or technical installations) or (warehouses or stocks of goods) or (motor vehicles or rail vehicles or air vehicles or water vehicles) or (forests or heathland or moors) or ((of agriculture or of the food industry or of forestry) and (installations or products))) and (({Actor} sets the object on fire or ({Actor} destroys the object by setting a fire and (wholly or in part))).

Assembled only from the variable surface forms (including the actor) and the computable structure carried in the XSD, not from the source column. It should read as the offence. This is the recoverability test: the law is reverse-derivable from the substrate.

DEPENDENT ASSESSMENTS (REACTIVE INVALIDATION)

ASSESSMENT	DEPENDS ON	INVALIDATION	TRIGGER EFFECT
[Object1]	Buildings, Huts	false	Recomputes when any input changes; propagates into the composite.
[Object2]	BusinessPremises, TechnicalInstallations	false	Recomputes when any input changes; propagates into the composite.
[Object3]	Warehouses, StocksOfGoods	false	Recomputes when any input changes; propagates into the composite.
[Object4]	MotorVehicles, RailVehicles, AirVehicles, WaterVehicles	false	Recomputes when any input changes; propagates into the composite.

FLAGS

SCOPE Paragraph 1 whole: the six-number object catalogue over the ownership qualifier and the two fire conducts with the extent pair. Struck per the marked-up source: (2) lesser cases. §306a to §306f are Excluded in the Treatment column (aggravations, consequences, negligence, repentance, fire hazard) and not encoded.

CATALOGUE DECOMPOSITION Each atomic object stands in its own gated block per the encoding principles, eighteen object variables across the six numbers; number 6's sector-times-kind structure is carried as the cross product of the three sector qualifiers and the two kinds in [Object6]. "namentlich Maschinen" is illustrative of technical installations and stays in the markup text under that variable.

CONDUCT PAIR "in Brand setzt" and "durch eine Brandlegung ganz oder teilweise zerstört" are distinct conducts: setting on fire requires no destruction; destruction by fire-setting carries the extent pair, mirrored in [ArsonConduct].

TREATMENT §306 is Operomise-tagged.

§307 · Causing an explosion through nuclear energy

NuclearExplosion · provenance StGB 307 · (1) encoded; (2)-(4) struck

SOURCE (ENGLISH, UNOFFICIAL)

(1) Any person who undertakes to cause an explosion by releasing nuclear energy and thereby to endanger the limb or life of another person or property of another of significant value shall be punished with imprisonment for a term of not less than five years. (2) Any person who causes an explosion by releasing nuclear energy and thereby negligently endangers the limb or life of another person or property of another of significant value shall be punished with imprisonment for a term of one to ten years. (3) If the offender at least recklessly causes the death of another person by the act, the penalty shall be 1. in the cases of paragraph 1, imprisonment for life or for a term of not less than ten years, 2. in the cases of paragraph 2, imprisonment for a term of not less than five years. (4) Any person who acts negligently in the cases of paragraph 2 and negligently causes the danger shall be punished with imprisonment for up to three years or a fine.

Q7	Session	{OfSignificantValue}	Element/Datum: the property is of significant value.?	Boolean
Q8	Session	{Undertakes}	Element/Datum: {Actor} undertakes the act.?	Boolean

FLAGS

SCOPE Paragraph 1 only: the undertaking offence. Struck per the marked-up source: (2) to (4) whole.

UNTERNEHMENSDELIKT

“Wer es unternimmt” makes (1) an undertaking offence: the attempt is the completed offence. **{Undertakes}** gates the infinitive elements (causing the explosion, the nuclear means and the endangerment as the content of the undertaking), so the composite is satisfied by the undertaking itself, faithful to the German structure.

SHARED ENDANGERMENT MERKMAL

“Leib oder Leben eines anderen Menschen oder fremde Sachen von bedeutendem Wert” carries the shared endangerment names (**{EndangersLimbOfAnother}**, **{EndangersLifeOfAnother}**, **{EndangersPropertyOfAnother}** with **{OfSignificantValue}**), shared with §308, §315 and §315a.

TREATMENT

§307 is Operomise-tagged.

§308 · Causing an explosion involving explosives

ExplosivesExplosion · provenance StGB 308 · (1) encoded; (2)-(7) struck

SOURCE (ENGLISH, UNOFFICIAL)	OPEROME MARKUP – ORIGINAL TEXT ENCODED
(1) Any person who, other than by releasing nuclear energy, in particular by explosives, causes an explosion and thereby endangers the limb or life of another person or property of another of significant value shall be punished with imprisonment for a term of not less than one year. (2) If the offender causes a serious damage to the health of another person or damage to the health of a large number of people by the act, the penalty shall be imprisonment for a term of not less than two years. (3) Any person who causes the explosion for the commission of a theft (Section 242), a gang theft (Section 244(1) no. 2) or an aggravated gang theft (Section 244a) shall be punished, in the cases of paragraph 1, with imprisonment for a term of not less than two years, in the cases of paragraph 2, with imprisonment for a term of not less than five years. (4) If the offender at least recklessly causes the death of another person by the act, the penalty shall be imprisonment for life or for a term of not less than ten years. (5) In less serious cases of paragraph 1, the penalty shall be imprisonment for a term of six months to five years; in less serious cases of paragraphs 2 and 3, imprisonment for a term of one to ten years. (6) Any person who negligently causes the danger in the cases of paragraph 1 shall be punished with imprisonment for up to five years or a fine. (7) Any person who acts negligently in the cases of paragraph 1 and negligently causes the danger shall be punished with imprisonment for up to three years or a fine.	«if ExplosivesExplosion is true»(1) {Actor} who, «if {OtherThanNuclearRelease} is true»other than by releasing nuclear energy «end if», in particular by explosives, «if {CausesExplosion} is true»causes an explosion «end if» and thereby endangers «if {EndangersLimbOfAnother} is true»the limb «end if» «if {EndangersLifeOfAnother} is true»or life of another person «end if» or «if {EndangersPropertyOfAnother} is true»property of another «if {OfSignificantValue} is true»of significant value «end if» «end if» shall be punished with imprisonment for a term of not less than one year. (2) If the offender causes a serious damage to the health of another person or damage to the health of a large number of people by the act, the penalty shall be imprisonment for a term of not less than two years. (3) Any person who causes the explosion for the commission of a theft (Section 242), a gang theft (Section 244(1) no. 2) or an aggravated gang theft (Section 244a) shall be punished, in the cases of paragraph 1, with imprisonment for a term of not less than two years, in the cases of paragraph 2, with imprisonment for a term of not less than five years. (4) If the offender at least recklessly causes the death of another person by the act, the penalty shall be imprisonment for life or for a term of not less than ten years. (5) In less serious cases of paragraph 1, the penalty shall be imprisonment for a term of six months to five years; in less serious cases of paragraphs 2 and 3, imprisonment for a term of one to ten years. (6) Any person who negligently causes the danger in the cases of paragraph 1 shall be punished with imprisonment for up to five years or a fine. (7) Any person who acts negligently in the cases of paragraph 1 and negligently causes the danger shall be punished with imprisonment for up to three years or a fine.«end if»

<code>{OfSignificantValue}</code>	Boolean	true / false / unknown	Session	the property is of significant value
<code>{OtherThanNuclearRelease}</code>	Boolean	true / false / unknown	Session	other than by releasing nuclear energy

RECONSTRUCTION FROM THE SUBSTRATE

Committed by any person (the actor) who: `{Actor}` causes an explosion and other than by releasing nuclear energy and (`{Actor}` thereby endangers the limb of another person or `{Actor}` thereby endangers the life of another person or (`{Actor}` thereby endangers property of another and the property is of significant value)).

Assembled only from the variable surface forms (including the actor) and the computable structure carried in the XSD, not from the source column. It should read as the offence. This is the recoverability test: the law is reverse-derivable from the substrate.

DEPENDENT ASSESSMENTS (REACTIVE INVALIDATION)

ASSESSMENT	DEPENDS ON	INVALIDATION	TRIGGER EFFECT
<code>[Endangerment]</code>	<code>EndangersLimbOfAnother</code> , <code>EndangersLifeOfAnother</code> , <code>EndangersPropertyOfAnother</code> , <code>OfSignificantValue</code>	false	Recomputes when any input changes; propagates into the composite.
<code>[ExplosivesExplosion]</code>	<code>CausesExplosion</code> , <code>OtherThanNuclearRelease</code> , <code>Endangerment</code>	false	Final composite. Re-evaluates on any input change; cannot resolve true while any input is unknown.
prohibition (EEX-P0)	<code>[ExplosivesExplosion]</code>	re-derives	The PrimeRule prohibition holds whenever the composite is true; re-derives on any change.

DECISION TREE

PHASE 1: gather inputs (Session)

- └ `{Actor}`
- └ `{CausesExplosion}`
- └ `{EndangersLifeOfAnother}`
- └ `{EndangersLimbOfAnother}`
- └ `{EndangersPropertyOfAnother}`
- └ `{OfSignificantValue}`
- └ `{OtherThanNuclearRelease}`

↓

PHASE 2: evaluate act / intermediate computables

- └ `[Endangerment]` = `EndangersLimbOfAnother` is true or `EndangersLifeOfAnother` is true or (`EndangersPropertyOfAnother` is true and `OfSignificantValue` is true)

↓

PHASE 3: evaluate the objective conditions

- └ `[ExplosivesExplosion]` = `CausesExplosion` is true and `OtherThanNuclearRelease` is true and `Endangerment` is true

↓

VERDICT (PrimeRule)

- └ `[ExplosivesExplosion]` is true → objective conditions realised → conduct PROHIBITED (subject to permissions / exceptions)
- └ `[ExplosivesExplosion]` is false → not realised

RECURSION / RE-ENTRY NOTES

No runtime re-entry. The operome is a single forward evaluation: inputs → act computable(s) → Tatbestand composite → prohibition verdict. Attempt and preparation, where the section provides for them, are separate operomes, not re-entries.

CIRCULARITY CHECK

- `[ExplosivesExplosion]` depends on `[Endangerment]`; none refer back to `[ExplosivesExplosion]`. No definitional cycle.
- Each computable reduces to input Booleans; the graph is a DAG and topologically sortable. Tristate is monotone: any unknown input holds the composite at unknown rather than forcing a verdict.

FLAGS

SCOPE Paragraph 1: the completed endangerment offence. Struck per the marked-up source: (2) to (7) whole.

CONTRAST WITH §307 Here the explosion and the endangerment are completed conduct (“herbeiführt ... gefährdet”), not an undertaking; “namentlich durch Sprengstoff” is illustrative of the non-nuclear means and stays in the markup text under `{OtherThanNuclearRelease}`.

SHARED ENDANGERMENT MERKMAL The shared endangerment names are reused; identity with §307, §315 and §315a is by name.

TREATMENT §308 is Operomise-tagged.

(1) Any person who, with the intention of damaging the health of another person, undertakes to expose that person to ionising radiation capable of damaging that person's health shall be punished with imprisonment for a term of one to ten years. (2) If the offender undertakes to expose an incalculable number of people to such radiation, the penalty shall be imprisonment for a term of not less than five years. (3) If, in the cases of paragraph 1, the offender causes a serious damage to the health of another person or damage to the health of a large number of people by the act, the penalty shall be imprisonment for a term of not less than two years. (4) If the offender at least recklessly causes the death of another person by the act, the penalty shall be imprisonment for life or for a term of not less than ten years. (5) In less serious cases of paragraph 1, the penalty shall be imprisonment for a term of six months to five years; in less serious cases of paragraph 3, imprisonment for a term of one to ten years. (6) Any person who, with the intention 1. of impairing the usability of a thing of another of significant value, 2. of lastingly altering adversely a body of water, the air or the soil, or 3. of damaging animals or plants of significant value not belonging to them, exposes the thing, the body of water, the air, the soil, the animals or the plants to ionising radiation capable of causing such impairments, alterations or damage shall be punished with imprisonment for up to five years or a fine. An attempt is punishable.

`«if MisuseOfIonisingRadiation is true»(1) {Actor} who, «if {ActsWithHealthDamageIntention} is true»with the intention of damaging the health of another person «end if», «if {Undertakes} is true»undertakes «end if» «if {ExposesPersonToRadiation} is true»to expose that person to ionising radiation «end if» «if {RadiationCapableOfDamagingHealth} is true»capable of damaging that person's health «end if» shall be punished with imprisonment for a term of one to ten years. FLAGS

SCOPE

Paragraphs 1 and 6: the health–damage undertaking against a person, and the object–exposure offence with its three–point intention catalogue. Struck per the marked–up source: (2) to (5), and (6)’s penalty and attempt sentence.

BOTH INTENT HEADS RETAINED (DELIBERATE)

“in der Absicht, die Gesundheit ... zu schädigen” in (1) and the three–point “in der Absicht” catalogue in (6) are live per the markup and the retention criterion: exposing things or persons to radiation capable of harm occurs lawfully (radiotherapy, sterilisation, materials testing); the intention is what separates the offence. The (6) gate {ActsWithImpairmentIntention} spans the three coordinated intent legs.

UNTERNEHMENSDELIKT IN (1)

“es unternimmt” as in §307: the undertaking is the completed offence; the exposure and capability are the content of the undertaking.

NOTE FOR §310

§310’s preparation leg 1 references the undertaking under §309(2), which is struck here; that reference resolves as an input in the §310 scope, while its references to (1) and (6) resolve in–corpus against this scope.

TREATMENT

§309 is Operomise–tagged.

§310 · Preparation of an explosion or radiation offence

PreparationOfExplosionOrRadiationOffence · provenance StGB 310 · (1) encoded; (2)–(3) struck

SOURCE (ENGLISH, UNOFFICIAL)	OPEROME MARKUP – ORIGINAL TEXT ENCODED
------------------------------	--

(1) Any person who, for the preparation of 1. a specific undertaking within the meaning of Section 307(1) or Section 309(2), 2. an offence under Section 308(1) which is to be committed by means of explosives, 3. an offence under Section 309(1), or 4. an offence under Section 309(6), produces, procures for themselves or another, transports, keeps in custody or makes available to another nuclear fuels, other radioactive substances, explosives or the special devices necessary for committing the act, shall be punished, in the cases of point 1, with imprisonment for a term of one to ten years, in the cases of points 2 and 3, with imprisonment for a term of six months to five years, in the cases of point 4, with imprisonment for up to three years or a fine. (2) In less serious cases of paragraph 1 no. 1, the penalty shall be imprisonment for a term of six months to five years. (3) In the cases of paragraph 1 nos. 3 and 4, an attempt is punishable.	«if PreparationOfExplosionOrRadiationOffence is true»(1) {Actor} who, for the preparation of 1. «if {PreparesUndertaking307} is true»a specific undertaking within the meaning of Section 307(1) «end if» «if {PreparesUndertaking309Para2} is true»or Section 309(2) «end if», 2. «if {PreparesOffence308ByExplosives} is true»an offence under Section 308(1) which is to be committed by means of explosives «end if», 3. «if {PreparesOffence309Para1} is true»an offence under Section 309(1) «end if», or 4. «if {PreparesOffence309Para6} is true»an offence under Section 309(6) «end if», «if {Produces} is true»produces «end if» «if {Procures} is true», procures «if {ForSelf} is true»for {Actor} «end if» «if {ForAnother} is true»or another «end if» «end if» «if {Transports} is true», transports «end if» «if {KeepsInCustody} is true», keeps in custody «end if» «if {MakesAvailableToAnother} is true»or makes available to another «end if» «if {NuclearFuels} is true»nuclear fuels «end if» «if {OtherRadioactiveSubstances} is true», other radioactive substances «end if» «if {Explosives} is true», explosives «end if» «if {SpecialDevices} is true»or the special devices necessary for committing the act «end if», shall be punished, in the cases of point 1, with imprisonment for a term of one to ten years, in the cases of points 2 and 3, with imprisonment for a term of six months to five years, in the cases of point 4, with imprisonment for up to three years or a fine. Committed by any person (the actor) who: ({Actor} prepares a specific undertaking within the meaning of Section 307(1) or {Actor} prepares a specific undertaking within the meaning of Section 309(2) or {Actor} prepares an offence under Section 308(1) to be committed by means of explosives or {Actor} prepares an offence under Section 309(1) or {Actor} prepares an offence under Section 309(6)) and (nuclear fuels or other radioactive substances or explosives or the special devices necessary for committing the act) and ({Actor} produces the object or ({Actor} procures the object and (for {Actor} or for another person)) or {Actor} transports the object or {Actor} keeps the object in custody or {Actor} makes the object available to another person).

Assembled only from the variable surface forms (including the actor) and the computable structure carried in the XSD, not from the source column. It should read as the offence. This is the recoverability test: the law is reverse-derivable from the substrate.

DEPENDENT ASSESSMENTS (REACTIVE INVALIDATION)

ASSESSMENT	DEPENDS ON	INVALIDATION	TRIGGER EFFECT
[PreparedOffence]	PreparesUndertaking307, PreparesUndertaking309Para2, PreparesOffence308ByExplosives, PreparesOffence309Para1, PreparesOffence309Para6	false	Recomputes when any input changes; propagates into the composite.
[PreparationObject]	NuclearFuels, OtherRadioactiveSubstances, Explosives, SpecialDevices	false	Recomputes when any input changes; propagates into the composite.
[PreparationVerbs]	Produces, Procures, ForSelf, ForAnother, Transports, KeepsInCustody, MakesAvailableToAnother	false	Recomputes when any input changes; propagates into the composite.
[PreparationOfExplosionOrRadiationOffence]	PreparedOffence, PreparationObject, PreparationVerbs	false	Final composite. Re-evaluates on any input change; cannot resolve true while any input is unknown.
prohibition (PER-P0)	[PreparationOfExplosionOrRadiationOffence]	re-derives	The PrimeRule prohibition holds whenever the composite is true; re-derives on any change.

DECISION TREE

PHASE 1: gather inputs (Session)

{Actor}

{Explosives}

{ForAnother}

{ForSelf}

{KeepsInCustody}

{MakesAvailableToAnother}

{NuclearFuels}

{OtherRadioactiveSubstances}

{PreparesOffence308ByExplosives}

{PreparesOffence309Para1}

{PreparesOffence309Para6}

{PreparesUndertaking307}

{PreparesUndertaking309Para2}

{Procures}

{Produces}

{SpecialDevices}

{Transports}

↓

PHASE 2: evaluate act / intermediate computables

[PreparedOffence] = PreparesUndertaking307 is true or PreparesUndertaking309Para2 is true or PreparesOffence308ByExplosives is true or PreparesOffence309Para1 is true or PreparesOffence309Para6 is true

[PreparationObject] = NuclearFuels is true or OtherRadioactiveSubstances is true or Explosives is true or SpecialDevices is true

[PreparationVerbs] = Produces is true or (Procures is true and (ForSelf is true or ForAnother is true)) or Transports is true or KeepsInCustody is true or MakesAvailableToAnother is true

↓

PHASE 3: evaluate the objective conditions

[PreparationOfExplosionOrRadiationOffence] = PreparedOffence is true and PreparationObject is true and PreparationVerbs is true

↓

VERDICT (PrimeRule)

[PreparationOfExplosionOrRadiationOffence] is true → objective conditions realised → conduct PROHIBITED (subject to permissions / exceptions)

[PreparationOfExplosionOrRadiationOffence] is false → not realised

RECURSION / RE-ENTRY NOTES

No runtime re-entry. The operome is a single forward evaluation: inputs → act computable(s) → Tatbestand composite → prohibition verdict. Attempt and preparation, where the section provides for them, are separate operomes, not re-entries.

CIRCULARITY CHECK

- [PreparationOfExplosionOrRadiationOffence] depends on [PreparedOffence], [PreparationObject], [PreparationVerbs]; none refer back to [PreparationOfExplosionOrRadiationOffence]. No definitional cycle.
- Each computable reduces to input Booleans; the graph is a DAG and topologically sortable. Tristate is monotone: any unknown input holds the composite at unknown rather than forcing a verdict.

FLAGS

SCOPE

Paragraph 1 whole: the four prepared–offence legs over the four–object catalogue and the five preparation verbs. Struck per the marked–up source: the tiered penalty clause inside (1), (2) and (3).

CROSS-REFERENCES, MIXED RESOLUTION

{PreparesUndertaking307}

,

{PreparesOffence309Para1}

 and

{PreparesOffence309Para6}

 resolve in–corpus against the §307 and §309 scopes of this document.

{PreparesUndertaking309Para2}

 references §309(2), which the markup strikes in that scope; that leg resolves as an input, recorded here.

{PreparesOffence308ByExplosives}

 resolves against the §308 scope with the by–explosives qualification carried in the variable.

VERB SET

The five verbs match §263a(3) except that “befördert” (transports) replaces “feilhält” (offers for sale); the beneficiary pair attaches to

{Procures}

 only, mirrored in

[PreparationVerbs]

.

TREATMENT

§310 is Operomise–tagged.

§315 · Dangerous interference with rail, shipping and air traffic

DangerousTrafficInterference · provenance StGB 315 · (1) encoded; (2)-(6) struck

SOURCE (ENGLISH, UNOFFICIAL)	OPEROME MARKUP – ORIGINAL TEXT ENCODED
(1) Any person who impairs the safety of rail, suspension railway, shipping or air traffic by 1. destroying, damaging or removing installations or means of transport, 2. creating obstacles, 3. giving false signs or signals, or 4. undertaking a similar, equally dangerous interference, and thereby endangers the limb or life of another person or property of another of significant value, shall be punished with imprisonment for a term of six months to ten years. (2) An attempt is punishable. (3) A term of imprisonment of not less than one year shall be imposed if the offender 1. acts with the intention of a) causing an accident, or b) facilitating or covering up another offence, or 2. causes a serious damage to the health of another person or damage to the health of a large number of people by the act. (4) In less serious cases of paragraph 1, the penalty shall be imprisonment for a term of three months to five years; in less serious cases of paragraph 3, imprisonment for a term of six months to five years. (5) Any person who negligently causes the danger in the cases of paragraph 1 shall be punished with imprisonment for up to five years or a fine. (6) Any person who acts negligently in the cases of paragraph 1 and negligently causes the danger shall be punished with imprisonment for up to two years or a fine.	«if DangerousTrafficInterference is true»(1) {Actor} who «if {ImpairsSafety} is true»impairs the safety of «end if» «if {RailTraffic} is true»rail «end if» «if {SuspensionRailwayTraffic} is true», suspension railway «end if» «if {ShippingTraffic} is true», shipping «end if» «if {AirTraffic} is true»or air traffic «end if» by 1. «if {Destroys} is true»destroying «end if» «if {Damages} is true», damaging «end if» «if {Removes} is true»or removing «end if» «if {Installations} is true»installations «end if» «if {MeansOfTransport} is true»or means of transport «end if», 2. «if {CreatesObstacles} is true»creating obstacles «end if», 3. «if {GivesFalseSigns} is true»giving false signs «end if» «if {GivesFalseSignals} is true»or signals «end if», or 4. «if {SimilarDangerousInterference} is true»undertaking a similar, equally dangerous interference «end if», and thereby endangers «if {EndangersLimbOfAnother} is true»the limb «end if» «if {EndangersLifeOfAnother} is true»or life of another person «end if» or «if {EndangersPropertyOfAnother} is true»property of another «if {OfSignificantValue} is true»of significant value «end if» «end if» shall be punished with imprisonment for a term of six months to ten years. FLAGS

SCOPE Paragraph 1 whole: the safety–impairment chapeau over the four traffic modes, the four interference means and the endangerment. Struck per the marked-up source: (2) to (6); the accident–or–concealment intentions live in struck (3) and so escalate, consistent with the retention criterion since (1)’s wrongfulness is objective. §315b to §315f (road traffic) are Excluded in the Treatment column.

MEANS DECOMPOSITION Number 1’s three verbs span the two coordinated objects in **[Means1]**; numbers 2 to 4 are single–act legs; the analogy clause of number 4 (“ein ähnlicher, ebenso gefährlicher Eingriff”) is a single evaluative act variable whose similarity assessment escalates.

SHARED ENDANGERMENT MERKMAL The shared endangerment names are reused, identical by name with §307, §308 and §315a.

TREATMENT §315 is Operomise–tagged.

§315a · Endangering rail, shipping and air traffic

EndangeringTraffic · provenance StGB 315a · (1) encoded; (2)-(3) struck

SOURCE (ENGLISH, UNOFFICIAL)

(1) Imprisonment for up to five years or a fine shall be imposed on anyone who 1. operates a rail or suspension railway vehicle, a ship or an aircraft although, as a result of the consumption of alcoholic beverages or other intoxicating substances or as a result of mental or physical deficiencies, they are unable to operate the vehicle safely, or 2. as the operator of such a vehicle or as a person otherwise responsible for safety, grossly breaches legal provisions on the safety of rail, suspension railway, shipping or air traffic, and thereby endangers the limb or life of another person or property of another of significant value. (2) In the cases of paragraph 1 no. 1, an attempt is punishable. (3) Any person who, in the cases of paragraph 1, 1. negligently causes the danger, or 2. acts negligently and negligently causes the danger, shall be punished with imprisonment for up to two years or a fine.

<code>{UnableToOperateSafely}</code>	Boolean	true / false / unknown	Session	{Actor} is unable to operate the vehicle safely

RECONSTRUCTION FROM THE SUBSTRATE

Committed by any person (the actor) who: ((({Actor} operates the vehicle and (a rail vehicle or a suspension railway vehicle or a ship or an aircraft) and ({Actor} is unable to operate the vehicle safely and (as a result of the consumption of alcoholic beverages or as a result of other intoxicating substances or as a result of mental deficiencies or as a result of physical deficiencies)))) or ((as the operator of such a vehicle or as a person otherwise responsible for safety) and {Actor} grossly breaches legal provisions on the safety of the traffic)) and ({Actor} thereby endangers the limb of another person or {Actor} thereby endangers the life of another person or ({Actor} thereby endangers property of another and the property is of significant value)).

Assembled only from the variable surface forms (including the actor) and the computable structure carried in the XSD, not from the source column. It should read as the offence. This is the recoverability test: the law is reverse-derivable from the substrate.

DEPENDENT ASSESSMENTS (REACTIVE INVALIDATION)

ASSESSMENT	DEPENDS ON	INVALIDATION	TRIGGER EFFECT
<code>[VehicleObject]</code>	<code>RailVehicle</code> , <code>SuspensionRailwayVehicle</code> , <code>Ship</code> , <code>Aircraft</code>	false	Recomputes when any input changes; propagates into the composite.
<code>[Leg2]</code>	<code>AsOperator</code> , <code>AsPersonResponsibleForSafety</code> , <code>GrosslyBreachesSafetyProvisions</code>	false	Recomputes when any input changes; propagates into the composite.
<code>[Incapacity]</code>	<code>UnableToOperateSafely</code> , <code>ConsumptionOfAlcohol</code> , <code>OtherIntoxicants</code> , <code>MentalDeficiencies</code> , <code>PhysicalDeficiencies</code>	false	Recomputes when any input changes; propagates into the composite.
<code>[Leg1]</code>	<code>OperatesVehicle</code> , <code>VehicleObject</code> , <code>Incapacity</code>	false	Recomputes when any input changes; propagates into the composite.
<code>[Endangerment]</code>	<code>EndangersLimbOfAnother</code> , <code>EndangersLifeOfAnother</code> , <code>EndangersPropertyOfAnother</code> , <code>OfSignificantValue</code>	false	Recomputes when any input changes; propagates into the composite.
<code>[EndangeringTraffic]</code>	<code>Leg1</code> , <code>Leg2</code> , <code>Endangerment</code>	false	Final composite. Re-evaluates on any input change; cannot resolve true while any input is unknown.
prohibition (ERT-P0)	<code>[EndangeringTraffic]</code>	re-derives	The PrimeRule prohibition holds whenever the composite is true; re-derives on any change.

DECISION TREE

PHASE 1: gather inputs (Session)

- `{Actor}`
- `{Aircraft}`
- `{AsOperator}`
- `{AsPersonResponsibleForSafety}`
- `{ConsumptionOfAlcohol}`
- `{EndangersLifeOfAnother}`
- `{EndangersLimbOfAnother}`
- `{EndangersPropertyOfAnother}`
- `{GrosslyBreachesSafetyProvisions}`
- `{MentalDeficiencies}`
- `{OfSignificantValue}`
- `{OperatesVehicle}`
- `{OtherIntoxicants}`
- `{PhysicalDeficiencies}`
- `{RailVehicle}`
- `{Ship}`
- `{SuspensionRailwayVehicle}`
- `{UnableToOperateSafely}`

↓

PHASE 2: evaluate act / intermediate computables

- `[VehicleObject]` = `RailVehicle` is true or `SuspensionRailwayVehicle` is true or `Ship` is true or `Aircraft` is true
- `[Leg2]` = (`AsOperator` is true or `AsPersonResponsibleForSafety` is true) and `GrosslyBreachesSafetyProvisions` is true
- `[Incapacity]` = `UnableToOperateSafely` is true and (`ConsumptionOfAlcohol` is true or `OtherIntoxicants` is true or `MentalDeficiencies` is true or `PhysicalDeficiencies` is true)
- `[Leg1]` = `OperatesVehicle` is true and `VehicleObject` is true and `Incapacity` is true
- `[Endangerment]` = `EndangersLimbOfAnother` is true or `EndangersLifeOfAnother` is true or (`EndangersPropertyOfAnother` is true and `OfSignificantValue` is true)

↓

PHASE 3: evaluate the objective conditions

- `[EndangeringTraffic]` = (`Leg1` is true or `Leg2` is true) and `Endangerment` is true

↓

VERDICT (PrimeRule)

- `[EndangeringTraffic]` is true → objective conditions realised → conduct PROHIBITED (subject to permissions / exceptions)
- `[EndangeringTraffic]` is false → not realised

RECURSION / RE-ENTRY NOTES

No runtime re-entry. The operome is a single forward evaluation: inputs → act computable(s) → Tatbestand composite → prohibition verdict. Attempt and preparation, where the section provides for them, are separate operomes, not re-entries.

CIRCULARITY CHECK

- `[EndangeringTraffic]` depends on `[VehicleObject]`, `[Leg2]`, `[Incapacity]`, `[Leg1]`, `[Endangerment]`; none refer back to `[EndangeringTraffic]`. No definitional cycle.
- Each computable reduces to input Booleans; the graph is a DAG and topologically sortable. Tristate is monotone: any unknown input holds the composite at unknown rather than forcing a verdict.

FLAGS

SCOPE

Paragraph 1 whole: the incapacitated–operation leg and the gross–breach leg, sharing the endangerment. Struck per the marked-up source: the sanctions head of (1), (2) and (3).

INCAPACITY DECOMPOSITION

The four causes (alcohol, other intoxicants, mental, physical) each stand in their own gated block, disjoined in **[Incapacity]** under the **{UnableToOperateSafely}** head; the same alcohol and intoxicant variables recur by name in §316.

GROSS BREACH

“grob pflichtwidriges Verhalten gegen Rechtsvorschriften” is a single evaluative act variable; which provision was breached and the grossness assessment escalate.

TREATMENT

§315a is Operomise-tagged.

§316 · Drink–driving

DrinkDriving · provenance StGB 316 · (1) core encoded; subsidiarity and (2) struck

SOURCE (ENGLISH, UNOFFICIAL)	OPEROME MARKUP – ORIGINAL TEXT ENCODED
(1) Any person who operates a vehicle in traffic (Sections 315 to 315e) although, as a result of the consumption of alcoholic beverages or other intoxicating substances, they are unable to operate the vehicle safely shall be punished with imprisonment for up to one year or a fine, unless the act is subject to punishment under Section 315a or Section 315c. (2) A person who commits the act negligently shall also be punished under paragraph 1.	«if DrinkDriving is true» (1) {Actor} who «if {OperatesVehicleInTraffic} is true» operates a vehicle in traffic (Sections 315 to 315e) «end if» although, «if {ConsumptionOfAlcohol} is true» as a result of the consumption of alcoholic beverages «end if» «if {OtherIntoxicants} is true» or other intoxicating substances «end if» , «if {UnableToOperateSafely} is true»{Actor} is unable to operate the vehicle safely «end if» shall be punished with imprisonment for up to one year or a fine, unless the act is subject to punishment under Section 315a or Section 315c. (2) A person who commits the act negligently shall also be punished under paragraph 1. «end if»

Q5	Session	{UnableToOperateSafely}	Element/Datum: {Actor} is unable to operate the vehicle safely.?	Boolean

FLAGS

SCOPE Paragraph 1's core. Struck per the marked-up source: the penalty with the §315a/§315c subsidiarity clause inside it, and (2) the negligence variant.

SUBSIDIARITY STRUCK (RECORDED) The subsidiarity clause sits inside the penalty strike, as in §246 and §248b and unlike §233(5) and §147; followed as marked, the asymmetry recorded as an editorial decision.

SHARED MERKMAL WITH §315A **{UnableToOperateSafely}**, **{ConsumptionOfAlcohol}** and **{OtherIntoxicants}** reuse the §315a names; identity is by name. The mental and physical deficiency causes of §315a have no counterpart here, exactly as the German narrows.

TREATMENT §316 is Operomise-tagged.

§316c · Attacks on air and sea traffic

AttacksOnAirAndSeaTraffic · provenance StGB 316c · (1) whole encoded; (2)-(4) struck

SOURCE (ENGLISH, UNOFFICIAL)

(1) Imprisonment for a term of not less than five years shall be imposed on anyone who 1. uses violence or attacks the freedom of decision of a person or undertakes other machinations in order thereby to gain control over, or to influence the navigation of, a) a civil aircraft in flight, or b) a ship employed in civil maritime traffic, or 2. in order to destroy or damage such an aircraft or ship or its cargo on board, uses firearms or undertakes to cause an explosion or a fire. An aircraft which has already been boarded by members of the crew or by passengers, or the loading of which has already begun, or which has not yet been left as scheduled by members of the crew or by passengers, or the scheduled unloading of which is not yet complete, stands equal to an aircraft in flight. (2) In less serious cases, the penalty shall be imprisonment for a term of one to ten years. (3) If the offender at least recklessly causes the death of another

OPEROME MARKUP – ORIGINAL TEXT ENCODED

{ActsWithDestructionIntention}	Boolean	true / false / unknown	Session	{Actor} acts in order to destroy the craft
{AttacksFreedomOfDecision}	Boolean	true / false / unknown	Session	{Actor} attacks the freedom of decision of a person
{BoardedByCrewOrPassengers}	Boolean	true / false / unknown	Session	the aircraft has already been boarded
{CargoOnBoard}	Boolean	true / false / unknown	Session	the aim extends to the cargo on board
{CivilAircraftInFlight}	Boolean	true / false / unknown	Session	a civil aircraft in flight
{CivilShipAtSea}	Boolean	true / false / unknown	Session	a ship employed in civil maritime traffic
{GainControl}	Boolean	true / false / unknown	Session	to gain control over the craft
{InfluenceNavigation}	Boolean	true / false / unknown	Session	to influence the navigation of the craft
{LoadingBegun}	Boolean	true / false / unknown	Session	the loading of the aircraft has already begun
{NotYetLeftAsScheduled}	Boolean	true / false / unknown	Session	the aircraft has not yet been left as scheduled
{OtherMachinations}	Boolean	true / false / unknown	Session	{Actor} undertakes other machinations
{UndertakesExplosion}	Boolean	true / false / unknown	Session	{Actor} undertakes to cause an explosion
{UndertakesFire}	Boolean	true / false / unknown	Session	{Actor} undertakes to cause a fire
{UnloadingNotComplete}	Boolean	true / false / unknown	Session	the scheduled unloading of the aircraft is not yet complete
{UsesFirearms}	Boolean	true / false / unknown	Session	{Actor} uses firearms
{UsesViolence}	Boolean	true / false / unknown	Session	{Actor} uses violence

RECONSTRUCTION FROM THE SUBSTRATE

Committed by any person (the actor) who: (({Actor} uses violence or {Actor} attacks the freedom of decision of a person or {Actor} undertakes other machinations) and ({Actor} acts in order to achieve the aim concerning the craft and (to gain control over the craft or to influence the navigation of the craft)) and (a civil aircraft in flight or a ship employed in civil maritime traffic)) or ({Actor} acts in order to destroy the craft and (a civil aircraft in flight or a ship employed in civil maritime traffic) and ({Actor} uses firearms or {Actor} undertakes to cause an explosion or {Actor} undertakes to cause a fire)).

Assembled only from the variable surface forms (including the actor) and the computable structure carried in the XSD, not from the source column. It should read as the offence. This is the recoverability test: the law is reverse-derivable from the substrate.

DEPENDENT ASSESSMENTS (REACTIVE INVALIDATION)

ASSESSMENT	DEPENDS ON	INVALIDATION	TRIGGER EFFECT
[AircraftInFlight]	BoardedByCrewOrPassengers, LoadingBegun, NotYetLeftAsScheduled, UnloadingNotComplete	false	Recomputes when any input changes; propagates into the composite.
[Craft]	CivilAircraftInFlight, CivilShipAtSea	false	Recomputes when any input changes; propagates into the composite.
[Leg2Means]	UsesFirearms, UndertakesExplosion, UndertakesFire	false	Recomputes when any input changes; propagates into the composite.

[Leg2]	ActsWithDestructionIntention, Craft, Leg2Means	false	Recomputes when any input changes; propagates into the composite.
[Leg1Means]	UsesViolence, AttacksFreedomOfDecision, OtherMachinations	false	Recomputes when any input changes; propagates into the composite.
[Leg1Purpose]	ActsWithControlIntention, GainControl, InfluenceNavigation	false	Recomputes when any input changes; propagates into the composite.
[Leg1]	Leg1Means, Leg1Purpose, Craft	false	Recomputes when any input changes; propagates into the composite.
[AttacksOnAirAndSeaTraffic]	Leg1, Leg2	false	Final composite. Re-evaluates on any input change; cannot resolve true while any input is unknown.
prohibition (AST-P0)	[AttacksOnAirAndSeaTraffic]	re-derives	The PrimeRule prohibition holds whenever the composite is true; re-derives on any change.

DECISION TREE

PHASE 1: gather inputs (Session) {Actor} {ActsWithControlIntention} {ActsWithDestructionIntention} {AttacksFreedomOfDecision} {BoardedByCrewOrPassengers} {CargoOnBoard} {CivilAircraftInFlight} {CivilShipAtSea} {GainControl} {InfluenceNavigation} {LoadingBegun} {NotYetLeftAsScheduled} {OtherMachinations} {UndertakesExplosion} {UndertakesFire} {UnloadingNotComplete} {UsesFirearms} {UsesViolence}
--

↓

PHASE 2: evaluate act / intermediate computables

[AircraftInFlight] = BoardedByCrewOrPassengers is true or LoadingBegun is true or NotYetLeftAsScheduled is true or UnloadingNotComplete is true

[Craft] = CivilAircraftInFlight is true or CivilShipAtSea is true

[Leg2Means] = UsesFirearms is true or UndertakesExplosion is true or UndertakesFire is true

[Leg2] = ActsWithDestructionIntention is true and Craft is true and Leg2Means is true

[Leg1Means] = UsesViolence is true or AttacksFreedomOfDecision is true or OtherMachinations is true

[Leg1Purpose] = ActsWithControlIntention is true and (GainControl is true or InfluenceNavigation is true)

[Leg1] = Leg1Means is true and Leg1Purpose is true and Craft is true

↓

PHASE 3: evaluate the objective conditions

[AttacksOnAirAndSeaTraffic] = Leg1 is true or Leg2 is true

↓

VERDICT (PrimeRule)

[AttacksOnAirAndSeaTraffic] is true → objective conditions realised → conduct PROHIBITED (subject to permissions / exceptions)

[AttacksOnAirAndSeaTraffic] is false → not realised

RECURSION / RE-ENTRY NOTES

No runtime re-entry. The operome is a single forward evaluation: inputs → act computable(s) → Tatbestand composite → prohibition verdict. Attempt and preparation, where the section provides for them, are separate operomes, not re-entries.

CIRCULARITY CHECK

- [AttacksOnAirAndSeaTraffic] depends on [AircraftInFlight], [Craft], [Leg2Means], [Leg2], [Leg1Means], [Leg1Purpose], [Leg1]; none refer back to [AttacksOnAirAndSeaTraffic]. No definitional cycle.
- Each computable reduces to input Booleans; the graph is a DAG and topologically sortable. Tristate is monotone: any unknown input holds the composite at unknown rather than forcing a verdict.

Q18	Session	{UsesViolence}	Element/Datum: {Actor} uses violence.?	Boolean

FLAGS

- SCOPE** Paragraph 1 whole, both sentences: the control leg, the destruction leg, and the in-flight equivalence. Struck per the marked-up source: the sanctions head of (1), (2), (3) and (4).
- BOTH PURPOSES RETAINED (DELIBERATE)** “um dadurch die Herrschaft ... zu erlangen oder auf dessen Führung einzuwirken” and “um ... zu zerstören oder zu beschädigen” are live per the markup and the retention criterion: each is what separates the offence from conduct otherwise covered elsewhere. The destruction-or–damage coordination lives inside the {ActsWithDestructionIntention} gate text with the {CargoOnBoard} extension gated separately.
- IN-FLIGHT EQUIVALENCE AUTHORED (SENTENCE 2)** The live second sentence authors [AircraftInFlight]: the four ground states stand equal to flight; {CivilAircraftInFlight} reads its extended content from it, recorded as rule AST-R80 on the §232 sentence–2 pattern.
- PREPARATION STRUCK (DELIBERATE CONTRAST)** (4)’s preparation variant is struck, the opposite of §263a(3) and §310; recorded as an editorial decision.
- TREATMENT** §316c is Operomise–tagged.

§317 · Disruption of telecommunications facilities

DisruptionOfTelecommunications · provenance StGB 317 · (1) encoded; (2)-(3) struck

SOURCE (ENGLISH, UNOFFICIAL)	OPEROME MARKUP – ORIGINAL TEXT ENCODED
(1) Any person who prevents or endangers the operation of a telecommunications installation serving public purposes by destroying, damaging, removing, altering or rendering unusable a thing serving the operation, or by withdrawing the electrical power intended for the operation, shall be punished with imprisonment for up to five years or a fine. (2) An attempt is punishable. FLAGS

SCOPE Paragraph 1 whole: the two interference results over the five thing-conducts and the power-withdrawal alternative. Struck per the marked-up source: (2) and (3).

VERB SET The five thing-verbs (destroys, damages, removes, alters, renders unusable) plus the power withdrawal mirror §316b's drafting, which is Excluded; the overlap is by wording only, not by reference.

TREATMENT §317 is Operomise-tagged.

§318 · Damage to important facilities

DamageToImportantFacilities · provenance St6B 318 · (1) whole encoded; (2)-(6) struck

SOURCE (ENGLISH, UNOFFICIAL)

(1) Any person who damages or destroys water pipes, locks, weirs, dykes, dams or other hydraulic structures, or bridges, ferries, ways or protective barriers, or devices serving mining operations for water management, for ventilation or for the entry and exit of the workers, and thereby endangers the limb or life of another person, shall be punished with imprisonment for a term of three months to five years. (2) An attempt is punishable. (3) If the offender causes a serious damage to the health of another person or damage to the health of a large number of people by the act, the penalty shall be imprisonment for a term of one to ten years. (4) If the offender causes the death of another person by the act, the penalty shall be imprisonment for a term of not less than three years. (5) In less serious cases of paragraph 3, the penalty shall be imprisonment for a term of six months to five years; in less serious cases of paragraph 4, imprisonment for a term of one to ten years. (6) Any person who, in the cases of paragraph 1, 1. negligently causes the danger, or 2. acts negligently and negligently causes the danger, shall be punished with imprisonment for up to three years or a fine.

PHASE 3: evaluate the objective conditions
└ [DamageToImportantFacilities] = FacilityObject is true and DamageConduct is true and Endangerment is true
↓
VERDICT (PrimeRule)
├ [DamageToImportantFacilities] is true → objective conditions realised → conduct PROHIBITED (subject to permissions / exceptions)
└ [DamageToImportantFacilities] is false → not realised
```

RECURSION / RE-ENTRY NOTES

No runtime re-entry. The operome is a single forward evaluation: inputs → act computable(s) → Tatbestand composite → prohibition verdict. Attempt and preparation, where the section provides for them, are separate operomes, not re-entries.

CIRCULARITY CHECK

- [DamageToImportantFacilities] depends on [Group2], [Group1], [Group3], [FacilityObject], [Endangerment], [DamageConduct]; none refer back to [DamageToImportantFacilities]. No definitional cycle.
- Each computable reduces to input Booleans; the graph is a DAG and topologically sortable. Tristate is monotone: any unknown input holds the composite at unknown rather than forcing a verdict.

QUESTIONNAIRE

#	CASCADE	VARIABLE	QUESTION / PROMPT	INPUT
Q1	Session	{Actor}	Who or what is the actor? Any natural person, legal person, or non-human system. Canonical home: PrimeRule.?	Reference
Q2	Session	{Bridges}	Element/Datum: bridges.?	Boolean
Q3	Session	{Damages}	Element/Datum: {Actor} damages the facility.?	Boolean
Q4	Session	{Dams}	Element/Datum: dams.?	Boolean
Q5	Session	{Destroys}	Element/Datum: {Actor} destroys the facility.?	Boolean

Q6	Session	{Dykes}	Element/Datum: dykes.?	Boolean
Q7	Session	{EndangersLifeOfAnother}	Element/Datum: {Actor} thereby endangers the life of another person.?	Boolean
Q8	Session	{EndangersLimbOfAnother}	Element/Datum: {Actor} thereby endangers the limb of another person.?	Boolean
Q9	Session	{Ferries}	Element/Datum: ferries.?	Boolean
Q10	Session	{Locks}	Element/Datum: locks.?	Boolean
Q11	Session	{MiningAccessDevices}	Element/Datum: devices serving mining operations for the access of the workers.?	Boolean
Q12	Session	{MiningVentilationDevices}	Element/Datum: devices serving mining operations for ventilation.?	Boolean
Q13	Session	{MiningWaterManagementDevices}	Element/Datum: devices serving mining operations for water management.?	Boolean
Q14	Session	{OtherHydraulicStructures}	Element/Datum: other hydraulic structures.?	Boolean
Q15	Session	{ProtectiveBarriers}	Element/Datum: protective barriers.?	Boolean
Q16	Session	{WaterPipes}	Element/Datum: water pipes.?	Boolean
Q17	Session	{Ways}	Element/Datum: ways.?	Boolean
Q18	Session	{Weirs}	Element/Datum: weirs.?	Boolean

FLAGS

- SCOPE Paragraph 1 whole: the two conducts over the thirteen facility objects in three groups, with the limb-or-life endangerment. Struck per the marked-up source: (2) to (6).
- ENDANGERMENT NARROWED (FAITHFUL) The endangerment limb is “Leib oder Leben eines anderen Menschen” only; the property limb of the shared formula (§307, §308, §315, §315a) has no counterpart in this section, and none is encoded. The two live endangerment names are shared by name.
- CATALOGUE DECOMPOSITION Thirteen facility objects in their own gated blocks across the three source groups; the mining devices carry their purpose qualifications in the variable surfaces.
- TREATMENT §318 is Operomise-tagged.

§323c · Failure to render assistance; obstruction of rescuers

FailureToRenderAssistance · provenance StGB 323c · (1) and (2) encoded; sanctions phrases struck

SOURCE (ENGLISH, UNOFFICIAL)	OPEROME MARKUP – ORIGINAL TEXT ENCODED
(1) Any person who, in the case of an accident or common danger or distress, fails to render assistance although this is necessary and can reasonably be expected of them in the circumstances, in particular where it is possible without substantial danger to themselves and without breach of other important duties, shall be punished with imprisonment for up to one year or a fine. (2) The same penalty shall apply to anyone who, in these situations, obstructs a person who is rendering or wishes to render assistance to a third party.	«if FailureToRenderAssistance is true»(1) {Actor} who, in the case of «if {Accident} is true»an accident «end if» «if {CommonDanger} is true»or common danger «end if» «if {Distress} is true»or distress «end if», «if {FailsToRenderAssistance} is true»fails to render assistance «end if» although this is «if {AssistanceNecessary} is true»necessary «end if» and «if {ReasonableInCircumstances} is true»can reasonably be expected of {Actor} in the circumstances, in particular where it is possible without substantial danger to {Actor} and without breach of other important duties «end if», shall be punished with imprisonment for up to one year or a fine. (2) The same penalty shall apply to {Actor} who, in these situations, «if {ObstructsPerson} is true»obstructs a person «end if» who «if {PersonRendersAssistance} is true»is rendering «end if» «if {PersonWishesToRenderAssistance} is true»or wishes to render «end if» assistance to a third party.«end if»

VARIABLES APPENDIX

VARIABLE	INPUT	VALUES	CASCADE	SURFACE FORM (SOURCE WORDS)
{Accident}	Boolean	true / false / unknown	Session	an accident
{Actor}	Reference	–	Session	any person (the actor)
{AssistanceNecessary}	Boolean	true / false / unknown	Session	the assistance is necessary
{CommonDanger}	Boolean	true / false / unknown	Session	common danger
{Distress}	Boolean	true / false / unknown	Session	distress
{FailsToRenderAssistance}	Boolean	true / false / unknown	Session	{Actor} fails to render assistance
{ObstructsPerson}	Boolean	true / false / unknown	Session	{Actor} obstructs a person
{PersonRendersAssistance}	Boolean	true / false / unknown	Session	that person renders assistance to a third party
{PersonWishesToRenderAssistance}	Boolean	true / false / unknown	Session	that person wishes to render assistance to a third party
{ReasonableInCircumstances}	Boolean	true / false / unknown	Session	the assistance can reasonably be expected of {Actor} in the circumstances

RECONSTRUCTION FROM THE SUBSTRATE

Committed by any person (the actor) who: ((an accident or common danger or distress) and {Actor} fails to render assistance and the assistance is necessary and the assistance can reasonably be expected of {Actor} in the circumstances) or ((an accident or common danger or distress) and {Actor} obstructs a person and (that person renders assistance to a third party or that person wishes to render assistance to a third party)).

Assembled only from the variable surface forms (including the actor) and the computable structure carried in the XSD, not from the source column. It should read as the offence. This is the recoverability test: the law is reverse-derivable from the substrate.

DEPENDENT ASSESSMENTS (REACTIVE INVALIDATION)

ASSESSMENT	DEPENDS ON	INVALIDATION	TRIGGER EFFECT
[Situation]	Accident, CommonDanger, Distress	false	Recomputes when any input changes; propagates into the composite.
[Para1]	Situation, FailsToRenderAssistance, AssistanceNecessary, ReasonableInCircumstances	false	Recomputes when any input changes; propagates into the composite.
[Para2]	Situation, ObstructsPerson, PersonRendersAssistance, PersonWishesToRenderAssistance	false	Recomputes when any input changes; propagates into the composite.
[FailureToRenderAssistance]	Para1, Para2	false	Final composite. Re-evaluates on any input change; cannot resolve true while any input is unknown.
prohibition (FRA-P0)	[FailureToRenderAssistance]	re-derives	The PrimeRule prohibition holds whenever the composite is true; re-derives on any change.

DECISION TREE

```
PHASE 1: gather inputs (Session)
├ {Accident}
├ {Actor}
├ {AssistanceNecessary}
├ {CommonDanger}
├ {Distress}
├ {FailsToRenderAssistance}
├ {ObstructsPerson}
├ {PersonRendersAssistance}
├ {PersonWishesToRenderAssistance}
└ {ReasonableInCircumstances}
↓
PHASE 2: evaluate act / intermediate computables
├ [Situation] = Accident is true or CommonDanger is true or Distress is true
├ [Para1] = Situation is true and FailsToRenderAssistance is true and AssistanceNecessary is true and ReasonableInCircumstances is true
└ [Para2] = Situation is true and ObstructsPerson is true and (PersonRendersAssistance is true or PersonWishesToRenderAssistance is true)
↓
PHASE 3: evaluate the objective conditions
└ [FailureToRenderAssistance] = Para1 is true or Para2 is true
↓
VERDICT (PrimeRule)
├ [FailureToRenderAssistance] is true → objective conditions realised → conduct PROHIBITED (subject to permissions / exceptions)
└ [FailureToRenderAssistance] is false → not realised
```

No runtime re-entry. The operome is a single forward evaluation: inputs → act computable(s) → Tatbestand composite → prohibition verdict. Attempt and preparation, where the section provides for them, are separate operomes, not re-entries.

CIRCULARITY CHECK

- [FailureToRenderAssistance] depends on [Situation], [Para1], [Para2]; none refer back to [FailureToRenderAssistance]. No definitional cycle.
- Each computable reduces to input Booleans; the graph is a DAG and topologically sortable. Tristate is monotone: any unknown input holds the composite at unknown rather than forcing a verdict.

QUESTIONNAIRE

#	CASCADE	VARIABLE	QUESTION / PROMPT	INPUT
Q1	Session	{Accident}	Element/Datum: an accident.?	Boolean
Q2	Session	{Actor}	Who or what is the actor? Any natural person, legal person, or non-human system. Canonical home: PrimeRule.?	Reference
Q3	Session	{AssistanceNecessary}	Element/Datum: the assistance is necessary.?	Boolean
Q4	Session	{CommonDanger}	Element/Datum: common danger.?	Boolean
Q5	Session	{Distress}	Element/Datum: distress.?	Boolean

Q9	Session	{PersonWishesToRenderAssistance}	Element/Datum: that person wishes to render assistance to a third party.?	Boolean
Q10	Session	{ReasonableInCircumstances}	Element/Datum: the assistance can reasonably be expected of {Actor} in the circumstances.?	Boolean

FLAGS

- SCOPE** Both paragraphs live: the failure offence and the obstruction-of-rescuers variant. Struck per the marked-up source: (1)'s penalty and (2)'s "Ebenso wird bestraft" head, the standing sanctions-phrase rule.
- "INSBESONDERE" ILLUSTRATION** "insbesondere ohne erhebliche eigene Gefahr und ohne Verletzung anderer wichtiger Pflichten möglich" is illustrative of the reasonableness standard, not a separate element; it stays in the markup text under {ReasonableInCircumstances}, the "namentlich" treatment.
- PARA 2'S SITUATION REFERENCE** "in diesen Situationen" resolves against [Situation], the same disjunction as paragraph 1; an obstruction outside an accident, common danger or distress is not within the composite.
- GENUINE OMISSION OFFENCE** Paragraph 1 is an echtes Unterlassungsdelikt: the conduct element is the failure itself; no §13 commission-by-omission bridge is needed or referenced.
- TREATMENT** §323c is Operomise-tagged.
